

ORIS COLOR TUNER //WEB

Web-based soft- and hardcopy proofing in one package

Communicating Color Worldwide

ORIS COLOR TUNER // WEB: The world's first proofing system providing web-based soft- and hardcopy proofing in one package!

Key Features

- View – Print – Certify in one application
- Soft- and hardcopy proofs matched to the same standards – FOGRA, GRACoL, SWOP, 3DAP etc.
- Easy to operate wizard-based user interface – no color expertise required
- Seamless client/server architecture
- Simple remote job submission, pre-flight and control
- Patented iterative color management gives you accurate and reproducible results
- Easy management of global remote proofing with latest generation of inkjet printers
- 30-day fully functional ORIS CERTIFIED // WEB included
- Printer setup wizard
- Selective color correction and profile smoothing
- Support for all Pantone, Pantone Live (via Esko Color Engine), Esko and HKS libraries
- Independent and iterative spot color matching
- Create and optimize spot colors visually via honeycomb layout
- Spot color correction via CxF/X-4 data embedded in PDF files
- Support for Hexachrome/n-channel profiles
- Continuous and halftone dot proofing option for color-accurate screened proofs
- Accepts all major digital file formats
- Intelligent scatter proof function
- Easy creation of media profiles
- Uses the printer manufacturer's original screening and resolutions
- Ready for the new industry standards as FOGRA51 (coated) and FOGRA52 (uncoated)

ORIS COLOR TUNER // WEB

Web-based soft- and hardcopy proofing in one package

Hard and soft proofs in one package

Afraid of making the wrong decision in proofing? Don't know whether to go hardcopy or softproof? CGS removes the risk of making the wrong decision by offering the industry's only integrated hardcopy and virtual proofing system. By combining the features of the two market leading products, ORIS Color Tuner and ORIS Soft Proof, into the brand-new **ORIS COLOR TUNER // WEB**, CGS provides the ultimate flexibility in color proofing technology – from one package and with risk-free and reliable results.

Contract proofs

With **ORIS COLOR TUNER // WEB**, CGS presents a groundbreaking web-based version of its product line. **ORIS COLOR TUNER // WEB** allows users to control and track print jobs from anywhere in the world via the Internet. The new user interface efficiently integrates the software features of ORIS Color Tuner, ORIS Soft Proof and ORIS CERTIFIED // WEB (optional) into one product, making it easier to manage and monitor global remote proofing – increasingly important with the popularity of embedded measurement devices. **ORIS COLOR TUNER // WEB** fully supports the new Epson SpectroProofer and the latest Canon iPF 6450 with "on board spectro". The intuitive and user-friendly interface allows users to work quickly and efficiently within a closed-loop environment.

Spot colors

Perfect spot color matching even via CxF/X-4 data embedded in PDF files and support for Hexachrome and n-channel profiles. No wonder that **ORIS COLOR TUNER // WEB** is the favorite of color experts all over the world.

Web-based

Web-based client/server architecture enables **ORIS COLOR TUNER // WEB** to be integrated easily and quickly within your existing workflow, independent of operating system or web browser. A comprehensive list of workflow tools, such as automatic preflighting, file compression, FTP send & receive, regular expressions, email notification etc., are included to make **ORIS COLOR TUNER // WEB** a powerful production workflow in its own right.

Supported file formats

ORIS COLOR TUNER // WEB supports all known pre-press file formats including PDF/X, composite or separated, PDF and PostScript, EPS, DCS, JPEG, TIFF, TIFF/IT-P1, 1-Bit TIFF, Esko LEN, Scitex Handshake CT/LW, Scitex NLW, NCT, INX ISIJet.

Recommended system configuration

- Intel® Core i7 or similar
- 4 GB Memory (RAM) or more
- 500 GB HDD (internal storage) or more
- Windows 7 or higher
- Internet Explorer 11 or RAID system conforming to specifications

The exact hardware configuration is dependent on the type and number of output devices.

Supported measuring instruments

- Current models from X-Rite (incl. former GretagMacbeth devices)
- Barbieri Spectro Swing, Barbieri LFP SP3, SpectroPad
- Konica Minolta FD-5, FD-5BT and FD-7, ColorScout A+
- Supports the latest measurement technology such as M0, M1 and M2
